Subject: Protecting POST herbicides
Attachments: Cotton Paper - COMMITTEE - Sept 17.pdf

Hey guys, I attached a neat manuscript on how cover crops, PRE herbicides, and a directed layby in cotton could reduce selection pressure for dicamba POST in cotton. I got most of the ideas for the study from discussions with you guys over the last five years or so.

This is a draft with at least two more rounds of reviews but will be submitted to agronomy journal for publication when ready. If you see something that doesn't make sense let me know so I can fix.

The results really caught me off guard!

RK you need to at least read the abstract so I can keep you in the weed loop!

SC
